SUMMARY

Experienced Test Automation Engineer proficient in designing, developing, and implementing automated testing solutions. Skilled in utilizing various testing tools and frameworks to streamline testing processes, enhance efficiency, and ensure product quality. Strong background in scripting languages and test automation methodologies, with a focus on continuous integration and delivery practices. Proven ability to collaborate cross-functionally to drive testing initiatives and deliver high-quality software products.

SKILLS

- Java
- Typescript
- Selenium
- Linux Shell Script
- SQL
- API
- JIRA
- HP ALM
- TestNG
- BDD Cucumber
- Maven
- Git
- Jenkins

EXPERIENCE

- 04/2022 - Current **Quality Engineering Senior Analyst, Accenture Solutions Private Limited, Coimbatore, India**
- 03/2020 - 04/2022 **Associate Software Engineer, Robert Bosch Engineering & Business Solutions, Bangalore, India**
- 10/2017 - 03/2020 **Software Engineer, Wipro Technologies Private Limited, Bangalore, India**

EDUCATION AND TRAINING

- 04/2017 **Bachelor of Engineering (B.E.),, Mechatronics Engineering**
K.S. Rangasamy College of Technology, Thiruchengode

CERTIFICATIONS

ISTQB – CTFL (Certified Tester Foundation Level) Certified

ACCOMPLISHMENTS

- Rewarded with OTA award for best performance in the year - 2021
- Rewarded with ACE award for best performance in the year - 2023

PROJECT SUMMARY

Project #1:

Name: Dell GTM and CIS Application

Role: Senior Software Engineer

Project Timelines: April 2022 – Present

Testing Approach: Automation and Manual Testing, REST API, Messaging Queues

Tools Used: Selenium Java, Postman, GitLab

Project Description:

As an Automation Tester at Dell Technologies, I am actively involved in the testing of Oracle Global Trade Management (GTM) Tool and Compliance Integration Service. This project aims to ensure the seamless functionality and regulatory compliance of Dell's global trade operations by leveraging automation testing methodologies.

Responsibilities:

- Developed and executed automated test scripts for Oracle Global Trade Management Tool and Compliance Integration Service at Dell Technologies, ensuring comprehensive coverage of functional scenarios and regulatory requirements.
- Test Script Creation and Execution: Utilized Selenium WebDriver and BDD Cucumber to create robust test scripts for executing end-to-end test scenarios
- Defect Management: Identified, logged, and tracked defects using JIRA.
- Regression Testing: Conducted regular regression test suite execution to verify the stability of Oracle GTM updates and Compliance Integration Service enhancements.

Project #2:

Name: Bosch Automotive After Market

Role: Associate Software Engineer

Project Timelines: March 2020 – April 2022

Testing Approach: Automation and Manual Testing

Tools Used: Selenium Java, Protractor TypeScript, Insomnia, Postman, Jenkins

Project Description:

Bosch Automotive Aftermarket software is used for diagnosing, maintenance and troubleshooting of automobiles which is used in worldwide Bosch Service centres. Ordering of Parts from wholesale dealers and Active Field Monitoring application used for research and development of existing Bosch automotive parts for better performance.

Responsibilities:

- Worked with Product, Design, and Engineering teams on requirements gathering and evaluation.
- Developed Test Scripts to implement Test Cases, Test Scenarios, and features for BDD (Behavior Driven Development) using Cucumber in Gherkins format.
- Automation of angular application using Cucumber framework with Protractor and Typescript.
- Participated in product design reviews to provide input on functional requirements, product designs, test estimates, schedules and potential risks.
- Active participation in the continuous improvement of the automation strategy and framework
- Extensive Knowledge in Agile Methodology and participated in Sprint planning, Sprint Retrospective, Product Backlog Refinement meetings.
